This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL

Fund Services

# IFSL Church House Tenax Absolute Return Strategies Class C Shares

A Sub-fund of the IFSL CH Special Mandates Fund (ISIN Income GB00BNBNRD03, Accumulation GB00BNBNRF27)

This Fund is managed by Investment Fund Services Limited (IFSL)

## Objectives and Investment Policy

The Sub-fund aims to provide an absolute return, aiming to achieve positive returns over rolling twelve-month periods at low levels of volatility (meaning changes in value of up to 5% per annum in normal market conditions).

Capital invested in the Sub-fund is at risk and there is no guarantee that a positive return will be achieved over a rolling twelve-month, or any other period.

The Sub-fund is actively managed and will gain a diverse exposure to a range of global asset classes.

The Sub-fund may at any one time be invested in one or more of the following: fixed interest securities, equities, other collective investment schemes, money market instruments, deposits, and cash and near cash.

The Sub-fund may invest in collective investment schemes managed or operated by, or whose authorised corporate director is, the ACD of a Sub-fund or one of its associates. No more than 10% of the Sub-fund's total assets may be invested in collective investments schemes.

The Manager has no fixed asset allocation for any asset class but will change the asset mix in the Sub-fund from time to time, considering market conditions, in a way that, in the Manager's view, is consistent with the Sub-fund's aim to maintain a low level of volatility. As such, the Sub-fund may hold high proportions in cash and other lower-risk assets such as cash, near cash, money market instruments and deposits.

The Manager is not constrained by any particular asset allocation in respect of geography, industry or sector. The equities in which the Sub-fund invests may be from companies anywhere in the world. The fixed interest securities may include floating rate notes, index linked or convertible securities.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The Fund aims, but does not guarantee, to deliver positive returns (greater than zero) in any market conditions over rolling 12 month periods. This puts it in the IA Targeted Absolute Return sector.

The IA publishes figures showing how often funds in this sector fail to provide returns greater than zero for available rolling 12 month periods over the last three years on its website ([www.theia.org/industry-data/fund-sectors/tar-monitoring](http://www.theia.org/industry-data/fund-sectors/tar-monitoring)).

As the Fund does not have a benchmark, you may want to assess the Fund's performance using this data.

The Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation shares which means income is invested back into the Fund and reflected in the price of your shares.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

## Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 3 because its investments have experienced low to moderate volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund will be exposed to stock markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

- The Fund has exposure to bonds, the prices of which will be impacted by factors including: changes in interest rates, inflation expectations and perceived credit

quality.

- When interest rates rise, bond values generally fall. This risk is generally greater for longer term bonds and for bonds with perceived lower credit quality.

- The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment.

Risks which are not adequately captured by the risk indicator include:

- In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner.

- In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended.

- The Fund's cash may be deposited with various financial institutions. The Fund may suffer a loss if these institutions fail to make its payments or become insolvent.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 31/03/2023. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS retail scheme when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 8 of the Fund's Prospectus, which is available at [www.ifslfunds.com](http://www.ifslfunds.com).

### One-off charges taken before or after you invest

<b>Entry Charge</b>	0.00%
<b>Exit Charge</b>	None

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the fund over each year

<b>Ongoing Charges</b>	0.89%
------------------------	-------

### Charges taken from the fund under certain conditions

<b>Performance Fee</b>	None
------------------------	------

## Past Performance

### Historic performance to 31 December 2022

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this share class is calculated in GBP.

This Fund was launched on 22 November 2007.

This share class was launched on 23 November 2015.

On 24 August 2020 the Fund converted from a NURS to a UCITS.
